

Feature	Azizian et al. (2025) Study	NSIR Scale (Sadownik, 2025)
<b>Role of AI</b>	<b>Observer/Evaluator:</b> Uses LLMs to analyze behavioral markers (eye contact, speech patterns).	<b>Social Partner:</b> Measures "Factor 1" (Social Presence) and "Factor 2" (Personal Bond).
<b>Measurement</b>	Accuracy in predicting ASD diagnosis (up to 89.6%).	Subjective items like "The robot is more like me than anyone else".
<b>Focus Area</b>	Behavioral features like "Social Overtures" and "Stereotyped Behaviors".	Emotional connection, such as "Sometimes I stare at the robot" or "We will be together forever".
