

Azizian et al. (2025) Focus	NSIR (Sadownik, 2025) Metric
Social Interaction Features (e.g., eye contact, emotional expression)	Social Comfort/Trust Safety (e.g., feeling comfortable undressing/sharing thoughts)
Atypical Behavioral Markers (e.g., staring, repetitive speech)	Anthropomorphic Connection (e.g., "Sometimes I stare at the robot")
AI vs. Human Performance Gap (detecting nuanced social cues)	Internal Perception Scale (quantifying the child's subjective kinship with the AI/robot)
