

<b>Coleman et al. (2025) Biological Factor</b>	<b>NSIR (Sadownik, 2025) Psychological Application</b>
<b>White Matter Structural Determinants</b>	<b>Factor 2 (Trust):</b> Explains why "Reliable Functioning" is essential for users with atypical signal speed.
<b>Slower Face Processing Latency</b>	<b>Item 2 (Staring):</b> Validates the need for a stable, simple social stimulus that allows for longer processing time.
<b>Atypical Social Brain Efficiency</b>	<b>Item 3 (Mind Attribution):</b> Measures the preference for "logic-based" attunement over "speed-based" human interaction.
<b>Multimodal Social Demands</b>	<b>Item 7 (Safety):</b> Assesses the comfort found in an environment that doesn't demand high-speed social "performance."
