

Concept in Huirem et al. (2020)	Application in NSIR (2025)
Situated Knowledge	The scale measures the specific, local social reality of a neurodivergent person and their robot.
Epistemic Advantage	Valuing "staring" or "non-verbal sharing" as a superior way for the user to connect (Items 2, 3).
Challenging the "God's Eye View"	Moving away from objective clinical "deficits" to subjective user "comfort".
Unveiling the "Real"	Going "underneath the surface of appearances" to find deep kinship (Item 1, 4).
