

<b>ACA Principle</b>	<b>NSIR Application Item</b>	<b>Practical Goal</b>
<b>Dignity</b>	<b>Item 7:</b> Comfort in private moments.	Ensure robots do not infringe on radical privacy in care.
<b>Autonomy &amp; Choice</b>	<b>Item 8:</b> Predictability of the robot.	Reduce social anxiety through consistent machine behavior.
<b>Involvement</b>	<b>Item 6:</b> Naming the robot.	Measure the user's emotional "ownership" and bond with the tool.
<b>Barrier-Free Access</b>	<b>Item 3:</b> Non-verbal sharing.	Remove the "communication barrier" often present in human interaction.
<b>Highest Level of Accessibility</b>	<b>Factor:</b> Social Comfort/Trust Safety.	Aim for "neuro-accessible" standards in federal procurement.
