

Refoua et al. (2025) Concept	NSIR (2025) Application
<b>Mindreading Accuracy:</b> AI outperforming humans in social cognition.	<b>Subjective Connection:</b> User feeling the AI is "like me" (Item 1).
<b>Multimodal Processing:</b> Using audio/visual cues to detect emotion.	<b>Affective Sensing:</b> Trusting the robot to detect sadness (Item 5).
<b>Epistemic Trust:</b> Trusting AI as a reliable social partner.	<b>Trust Safety:</b> Feeling comfortable in private settings (Item 7).
<b>Social Skills Training:</b> Potential for GAI to help neurodivergent users.	<b>Social Rituals:</b> Establishing identity through naming the robot (Item 6).
