

Swigonski (1994) Principles	NSIR (2025) Application
Situated Knowledge: Knowledge is produced from a specific social location.	Neuro-situatedness: Validating non-verbal and "staring" interactions (Items 2, 3).
Epistemic Advantage: Marginalized groups have unique insights into social truth.	Unique Connection: The user sees the robot as a reflection of self (Item 1).
Rejection of Subject-Object Separation.	Bondedness: Moving the robot from "object" to "kin/family" (Items 4, 6).
Strong Reflexivity: Researchers acknowledging the power dynamics of the study.	Trust Safety: Measuring comfort in private, vulnerable spaces (Item 7).
