

Prato-Previde et al. (2022)	NSIR (2025) Application
Anthropomorphism: Attributing mental states to animals.	Kinship: Attributing a "like-me" status to a robot (Item 1).
Attachment: Seeking a "safe haven" and security.	Trust Safety: Feeling safe and unjudged in private (Item 7, 8).
Empathy: Sensing and responding to the other's feelings.	Affective Sensing: Believing the robot can detect sadness (Item 5).
Durability: A long-term, significant emotional bond.	Forever Bond: The intention to stay together "forever" (Item 4).
